ABOUT ME

I'm a passionate and ambitious student currently enrolled in a 3-year Diploma in Software Engineering with a specialization in Artificial Intelligence. Before this, I completed a 1-year Intermatric program under SBTE from Aptech, following my matriculation.

My interests lie in programming, problem-solving, and applying AI to real-world challenges. I'm gaining hands-on experience with technologies like HTML5/CSS, Bootstrap, JavaScript, PHP, MYSQL, Laravel, C#, Microsoft Sql Server, Asp.Net Mvc, .Net Framework and exploring areas such as machine learning and data science.

I'm always eager to learn, build, and collaborate. Currently looking for opportunities to work on projects, internships, and expand my network in the tech industry.

EXPERIENCE

- Web Developer (1.5 Years of Experience)
- Built responsive web applications using .NET Framework (ASP.NET MVC), Laravel, and PHP.
- Designed front-end layouts with HTML5, CSS3, and JavaScript.
- Developed backend logic in C# with SQLServer and MySQL integration.
- Created mobile app UI prototypes using Figma.
- Managed projects with Git and GitHub.
- Used Microsoft Office for reports and documentation.

PROJECTS / E-PROJECT

1. Watch Store Website
- Responsive watch showcase built using HTML, CSS, and Bootstrap.

2. Historical Places Website
- Responsive website featuring famous landmarks using HTML, CSS, and Bootstrap.

3. Mobile App Login & Register UI (Figma)
- Simple mobile UI screens designed in Figma with clean layout and buttons.

4. Electronic Shop Website (E-Project)
- Group project built with HTML, CSS, Bootstrap, JavaScript, and JSON for an online shop.

5. Courier Management System (E-Project)
- Group project built with HTML, CSS, Bootstrap, JavaScript, and JSON for an online shop.

6. E-Greetings Cards (E-Project)
- Dynamic website built with .NET Framework (ASP.NET MVC, C#) and SQL Server, offering birthday and wishes cards with admin panel control.
